## VINCRYL FAST

Braided & Coated Polyglactin 910 (Fast Absorbable)  
Absorbable Surgical Suture U.S.P.

[www.vinculumutures.com](http://www.vinculumutures.com)

**VINCRYL FAST** – Braided & Coated Polyglactin 910 Suture is an absorbable, synthetic, sterile surgical suture composed of a low molecular weight co-polymer made from 90% glycolide and 10% L-lactide.

### Indications:

VINCRYL Polyglactin 910 synthetic absorbable suture is indicated only for use in uterus approximation, superficial soft tissue approximation of the skin and mucosa, where only short term wound support of 7-10 days is required.

- Secure Knot holding capacity
- Smooth surface provides easy tissue passage.

### Additional Information

Suture Characteristics	:	Absorbable Surgical Suture (Synthetic)
Suture Type	:	Braided
Suture Material	:	Composed of a co-polymer, 90% of glycolide and 10% of L-lactide
Suture Coating	:	Poly (glycolide-co-L-lactide) & calcium stearate
Suture Color	:	Undyed
Suture Wound Support	:	7 to 10 days
Suture Absorption	:	Absorption takes place through hydrolysis completely in 40 to 45 days.
Suture Tensile Strength	:	75% of tensile strength is retained for 3 days and 50% till 5 days
Suture USP Range	:	4/0 to 2
Sterilization	:	Ethylene Oxide (EO)
Shelf Life	:	3 Years
Product Characteristics	:	Excellent tensile strength, Excellent knot tying, Minimum tissue reaction
Suture Packaging	:	In an aluminium foil packages with or without needle
Suture Needle Type	:	Round bodied, Cutting, Reverse Cutting, Taper Cutting, Trocar Point, Straight, Blunt point.
