

VINCULUMTM SUTURES

A Product of Vinculum Sutures (India) Private Limited

VINLON

Monofilament Polyamide
Non Absorbable Surgical Suture U.S.P.

www.vinculumsutures.com

VINLON – Monofilament Polyamide (Nylon) is a non absorbable sterile surgical suture, composed of the long-chain aliphatic homo polymers Nylon 6 and Nylon 6,6. VINLON Monofilament Polyamide Sutures are dyed black or blue to enhance visibility in tissue.

Indications:

Monofilament Polyamide Suture is indicated for use in general soft tissue approximation and/or ligation, including use in General Surgeries, Gynecological, Orthopedics, Skin Closure, Hard Tissues approximation, Casualty stitching, Cardiovascular, Ophthalmic and Neurological procedures.

The best material for skin approximation

- Being a monofilament with smooth surface never support bacterial growth followed by capillary action
- Uniform elasticity supports small movements results cosmetic effect
- Ultra smooth surface results negligible pain.

Additional Information

Suture Characteristics	:	Non Absorbable Surgical Suture
Type	:	Monofilament
Material	:	Polyamide (Nylon)
Color	:	Black
Absorption	:	Non Absorbable
USP Range	:	6/0 to 2
Sterilization	:	Ethylene Oxide (EO)
Shelf Life	:	5 Years
Product Characteristics	:	Excellent tensile strength, Excellent knot tying, Minimum tissue reaction.
Packaging	:	In food grade folder packed in a medical grade pouch, with or without needle
Needle Type	:	Round bodied, Cutting, Reverse Cutting, Taper Cutting, Trocar Point, Straight, Blunt point.
