

VINCULUMTM SUTURES

A Product of Vinculum Sutures (India) Private Limited

VINMONO

Monofilament Polyglecaprone 25
Absorbable Surgical Suture

www.vinculumsutures.com

VINMONO - Polyglecaprone 25 suture is a monofilament synthetic absorbable surgical suture made from a copolymer of glycolide and epsilon-caprolactone. Monofilament Poliglecaprone 25 suture copolymer has been found to be non antigenic, non pyrogenic and elicits only a slight tissue reaction during absorption.

Indications:

Poliglecaprone 25 sutures are indicated for use in general soft tissue approximation and/or ligation, including use in Female's skin approximation, Subcutaneous approximation, General surgery, Plastic surgery, Microsurgery, Ophthalmic surgery, Gynecology, Trichology and Orthopedics

Additional Information

Characteristics	:	Absorbable Surgical Suture (Synthetic)
Type	:	Monofilament
Material	:	A mixture of 75% of poly (glycolide) and 25% of co-caprolactone
Coating	:	–
Color	:	Undyed / Violet
Wound Support	:	21 to 28 days
Absorption	:	Absorption takes place through hydrolysis completely in 90 to 120 days.
Tensile Strength	:	50% of tensile strength is retained for 14 days.
USP Range	:	4/0 to 2
Sterilization	:	Ethylene Oxide (EO)
Shelf Life	:	3 Years
Product Characteristics	:	Excellent tensile strength, Excellent knot tying, Minimum tissue reaction
Packaging	:	In an aluminium foil packages with or without needle
Needle Type	:	Round bodied, Cutting, Reverse Cutting, Taper Cutting, Trocar Point, Straight, Blunt point.
